

On Aug 4th 2018 your scouts will be able to say,
" I designed a moon base, flew rockets, helped plan a mission to Mars, used Self Contained Underwater Breathing Apparatus, built robots and earned 2 technology Merit Badges, and an Eagle Required Merit Badge. What did you do with your weekend?"

SCOUTS PROGRAM- Aug. 3-5 2018
STEM are this years featured programs.
And YES the Duck Tape Merit Badge is back.

Options are plentiful, classes are expandable and we do not anticipate having to turn away anyone (though early registration offers the most options, as classes fill). That being said, there are some important prerequisites (a list on the register tab) as we strive to give Scoutmasters 'completed MBs, preference will be given to scouts who have completed prerequisites and some will 'require' prerequisites to be completed to get in. Metalwork will fill early and requires prerequisites to get in.

WEBELOS PROGRAM Aug. 4th 2018
Earn 2 Adventure Pins - Readyman and Art Explosion; Auqaman too. Webelos will rotate through the three morning classes and enjoy a free afternoon for fun. How much fun does that sound like!
Webelos Units are encouraged to partner with a Troop and camp the whole weekend, but it is your choice.

Inflatables, demonstrations, food vendors and early registrated Units will have the best chance to get the merit badges they want.

We are running a Disaster Drill for the First Aid and Emergency Prep programs... This is going to be a ton of Fun and a learning experience for everyone... Chess Games
Register is opens for all now.
