

We invite you to go boldly where no troop has gone before, seek out new and high tech Merit Badges: Space Exploration, Aviation, Radio, and Electronics to name a few. Learn how to use a 3D printer or design a video game using Unity 3D. #SpaceJamSTEM is the scouting technology event of the year. You will want to get your registration in early. Tons of high tech merit badges, chess, underwater robotics, food vendors and more!

A few things: 1. Space Jam – 17 is the last on-site Space Jam. Denny T-17 and Brian Crew 272 have run Space Jam from the beginning. This will be a Friday camp out, Saturday Space Jam.

2. Space Jam – 18 is going to be Virtual, in the cloud, just like we did in SJ-15. Crew 272 will be running it from then forward. We will have on-line registration and ZOOM meetings with the best of class teachers. We had awesome reviews from SJ-15, we will be even better!

So come to SJ 17 and celebrate Denny's 17 years of Space Jam.... And get ready to Go even higher tech in 2024.
